

## 1.02. Introduction for articles in the First Series from Na\_chala

Author: Shkrudnev F.D.

The processes that take place before our eyes are objective and unbiased. No one can change them. Many of our supporters have already seen this firsthand, but many are still thinking and on the way to knowledge. N. LEVASHOV used to say: "people WAKE UP..."

Unfortunately, this process is slow. But you can't hurry here - you can do harm. As one famous character used to say: "Haste is needed when catching fleas..." note one feature of what has been happening recently - "discovered" by botanists from modern science that "fleas - in many regions of our country - have disappeared somewhere!" And not just fleas. But this is a separate story, which was described by us earlier, in previous publications.

**A lot of letters come to us asking those who know (we emphasize - not curious, but rather - KNOWING) to tell us, write for further reading and understanding about the programs "SvetL" - created and "launched" in Russia (and now in other territories) since 2008, thanks to the Outstanding Russian Scientist - Nikolai Viktorovich Levashov and his "Friends", who in one way or another took part in this PROCESS. You need to understand that this is a PROCESS that tends to improve, adapt and regulate in the current event moments of real TIME. These programs were not public at that time, due to the circumstances, and only some of them have become available and public to people today.**

All this together causes a genuine interest and desire to learn as much as possible about these Programs. A "huge" desire to learn the "physics of processes" in the "work" of the "SvetL" programs is also observed in the so - called "opponents" (or more precisely, those who would like to stop or simply destroy these programs through "knowledge"), because the results of the "work" of the Programs have recently become obvious, public and indisputable.

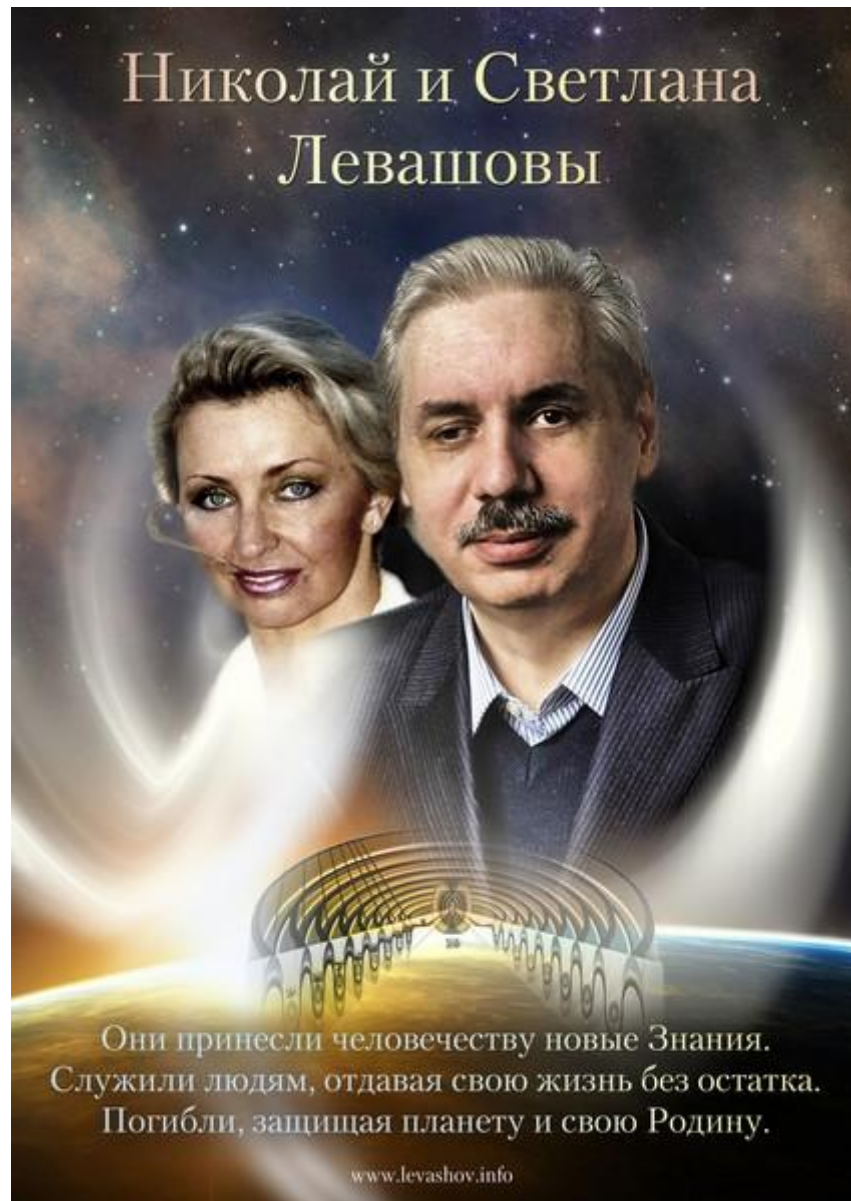

We live in an amazing time - a time of fundamental changes on our Planet. Today we are PARTICIPANTS in global processes of change, "launched" for GOOD, not for evil, as it has been for the last 17 and a half thousand years, and especially since the ZERO YEAR of OUR ERA.

ALL this is DESCRIBED in DETAIL in the MAIN, recently public "monograph" - "FUNDAMENTALS of the FORMATION of HUMANITY" and the well-known work of N. Levashov - "The Last Appeal to Mankind", **and there is no need to repeat what has been said.**

We have been thinking for a long time about how to correctly describe what caused such a LIVELY INTEREST with its effective actions on the already accomplished facts regarding the life support of many people who came into contact with the SvetL Programs, in one way or another.

How to correctly state that these people have begun the process of "transition" from the state of PEOPLE to their NATIVE, GENERIC state-a PERSON, with all the consequences that follow from this. All this can be stated in a few sentences and pictures in the format of an advertising video, or it will require writing (describing) more detailed PROCESSES and "accompanying" moments that accompany these objective PROCESSES in the EVENTS TAKING place TODAY.

We took as a basis the statement of N. Levashov, that, "...**The human brain perceives only the information that it, the Brain, is ready to perceive, due to its "readiness" to perceive the information received.**" Therefore, we initially, in a concise form as possible, began to give some basic concepts from the works that we have widely distributed recently. We have compiled them into a series of articles, as a single material necessary for understanding what You are so insistently asking us. We were allowed to tell about how and who "came up with" and decided to create such a thing. Why and for what, at the first stage of creation, it was conceived and "born". What it led to and how it started to develop.

**Why it got the name "light", and how IT DEVELOPED into PROGRAMS**, and did not remain a single executable function of a separate Device. What was implemented "and" invested "in SvetL at the first stage of development, and why other stages appeared. **How it all developed after the untimely death (destruction) of both Svetlana and Nikolai Levashov.**

**How the Programs work now, what transformations and in connection with what these programs have undergone.** Simply put, we will identify and show You the "goal Vector" of the implementation and "work" of the PROGRAMS, and give specific examples of some of the processes that are already OCCURRING before YOUR EYES. You will be able to independently understand the material presented in two ways.

The first is by accepting the information on FAITH (we recommend that you look at the concept and meaning of the word FAITH).

The second is to put the above into question and, taking a "Big shovel" in your hands, start digging your own trench of KNOWLEDGE for a deeper understanding of what we have stated and determining where this information is located - **between "LIES AND TRUTH" (as is done in modern science and not only - today, for now) or between "TRUTH AND FACT".**

**THIS IS YOUR CHOICE.**

We decided to call this series of articles "**ZERO KNOWLEDGE**". This is the "initial knowledge", without which it makes no sense to move forward in understanding what is HAPPENING TODAY. No matter how anyone WANTS to and no matter how anyone THINKS.

This material is the decryption of texts received as an explanatory base for analyzing the current situation and for performing certain calculations at the request of the Management System to identify the program functions performed as they are executed, as well as everything related to the understanding and application of the SvetL Programs since 2008.

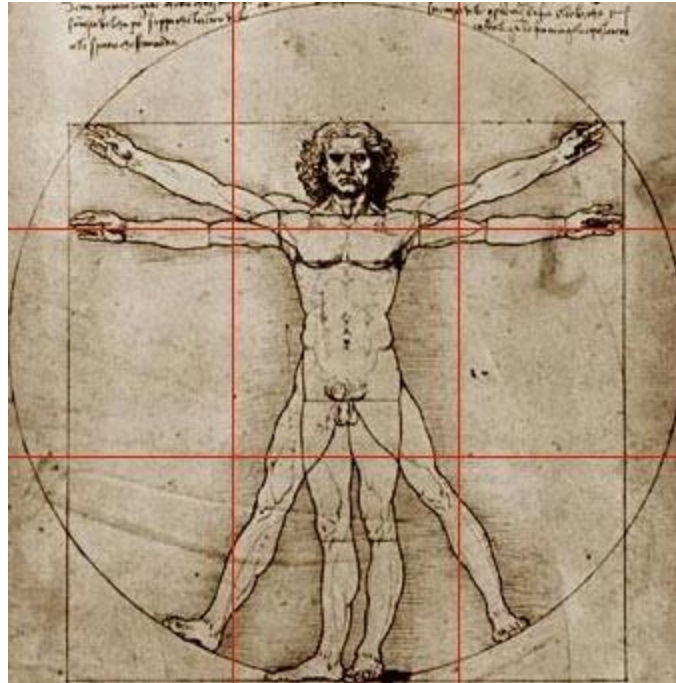

Today it is already possible to highlight the fact that materials were transmitted and worked out in detail, and algorithms and programs were developed for solving problems from the class "System analysis and research of current operations in relation to current events". Much of what we will provide today, back in the late 80's, early 90's, was brought to the attention of the Leadership of the Academy of Sciences of the USSR (President of the Academy of Sciences Alexander and the 1st Department of the state Committee of inventions, Marchuk, Osipov). At the same time, the Chairman of the state Committee of inventions, I. S. Nayashkov, did not recommend making public this information and some of the work already completed (which N. V. Levashov also knew about) due to their strategic significance. This was reported to President Mikhail Gorbachev, it was known in the military-industrial complex under the Council of Ministers of the USSR, the support was assigned to the 6th Main Directorate of the KGB of the USSR (personally N. A. Sham). The essence of this information was that the programs that are used to calculate the options for controlling the brain matrix with the dimension of the problem  $512 \times 512$  have already been tested.

Special attention was paid to the Golden section as the basis for building all structures on Earth.

New types of functions have been created, calculations on transients have been performed, and atomic schemes, their structure, relationships, and principles of biostructure formation have been obtained.

The entire frequency balance of the world around us and all biostructures is built on Prime numbers, each of which contains more than 19 digits in the 10th number system. Rows of prime numbers have been obtained to control all major changes made to the Program.

There is practically no field where the interests of identification with modern science are not affected - starting from mathematics, physics, chemistry, biology, medicine, psychology, celestial mechanics, etc. And we will provide this material to You in the light of the consideration of fundamentally new knowledge (new science), **mainly on the example of the application and use of the "SvetL" Programs.**

The material presented below will be presented in a concise form, since it is not a textbook and is intended only for understanding some of the basics related not only to the SvetL Programs, but also other new concepts in science that are already in demand by the current events that are taking place.

This material, intended for publication, is not desirable to provide those genotypes that were planned to be left as part of the "Golden million". **Today, it is enough for them to have the TORU as the basis of obscurantism and the entire modern scientific base.**

**The viewing sequence is by chapter numbers.**

The only material provided is that which is reflected in the works of Russian scientists N. V. Levashov, A. M. Khatybov, N. A. Morozov, the Research Institute for Preventative Strategies under the direction of B. V. Makov and the Russian Scientific and Technical Society under the direction of F. D. Shkrudnev, as well as materials that were previously known only to a fairly narrow circle of people and are now allowed to be widely published.
