

1.18 (2). Problems of social violence and the new world order in the works of Svetlana and Nikolai Levashov

Author: Yakovlev A.V.

The problems of social violence, one way or another, were touched upon in most of the speeches and works of Nicolai Levashov. Most emphatically, they are revealed in the book "Essence and Mind" [1]. Particular emphasis was placed on the fact that violence remains as such regardless of the social source of its origin:

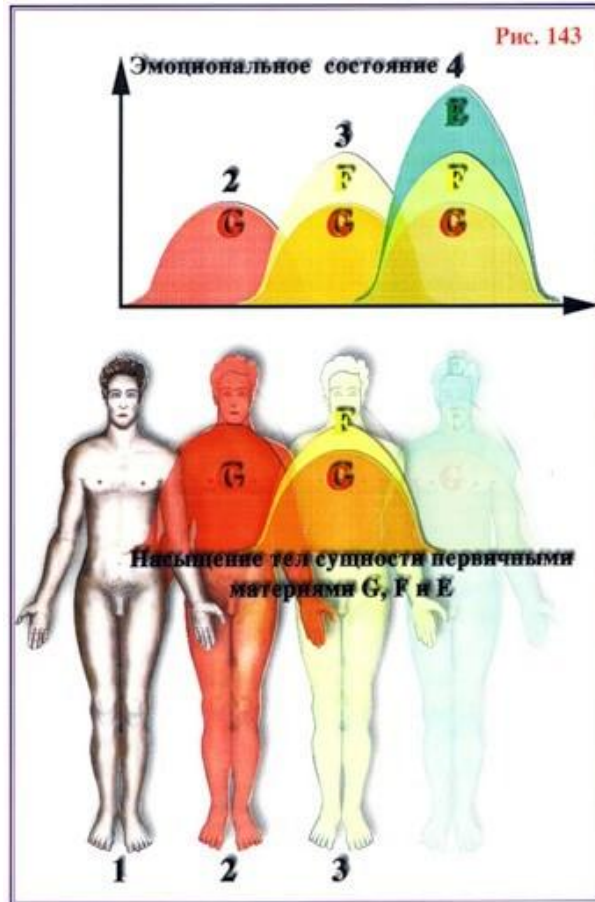

And it is not always the violence of the minority over the majority that is worse than the violence of the majority over the minority, it all depends on which minority and which majority. But regardless of which group the violence comes from, violence remains violence that limits the individual freedom of a particular person who recognizes himself as part of a pack, a population, a species, a community of people that we call human society.

And as the most illustrative example N. Levashov used Christianity. Non-resistance to evil by the violence of the first Christians was eventually replaced by militant Christianity, in which the commandment "thou shalt not kill" was extended only to those who believed in Christ as "necessary". And everyone else, even Christians, but believers in Christ in a slightly different way, turned into malicious heretics, and non-Christians and just pagans - barbarians who must be forced to believe in Christ or be killed, burned at the stake, torn apart, etc. The same action of a person was evaluated in the opposite way, depending on who the action was performed against. If against the "right Christian" - it turned into a grave sin, if against all others - a holy act. And the more people such a "saint" killed, the greater his holiness was. And this applies not only to Christianity, but, practically, to all world religions, both existing now, and those that disappeared into the chaos of human history. Even in such peaceful Buddhism, one can recall the great Tibetan saint Milarepa, who in his youth studied black magic and, according to the teachings of a vengeful mother, killed 35 enemies - relatives in one fell swoop when the roof of the house collapsed. But then he felt deep remorse for having done so much evil, and joined the "true religion" and set out on the path of spiritual service, achieving legendary fame.

Also, Nikolai Levashov emphasized the **consequences of each action**, and especially violence, when they are manifested **not only at the level of a person's essence, but also at the level of each of his cells, at the level of each of his chromosomes**. Moreover, violent death affects the evolutionary development of not only the killer, but also his victim. And, as a consequence, there is a negative evolutionary shift in the chain of incarnations of the essence of the victim.

But especially in the material in Chapter 9, "The Nature of Karma or the Anatomy of Sin," should be read by leaders of all ranks, so that they better understand their full responsibility not only for their personal actions, but also for the management decisions made, especially those related to violence against people and society as a whole. The laws of Nature (on which the work of the resurgent native CPS is based) are the same for everyone:

"Nature does not depend on the orders given by one person to another or other, and does not obey them. Nature does not depend on whether a person **correctly** or **incorrectly** understands the nature of the manifestation of the laws of nature, what religious or social laws exist in human society. The laws of nature are what they are, whether we like it or not. But nevertheless, this does not mean that the **"extreme"**, **"switchman" is only a forced performer, no matter how much he did not desire to give such orders.** The giver of the order (s) in order to force others to execute them creates a mental influence on the performers themselves in order to force them to execute their orders.

And maybe this punishment will not appear immediately, but sooner or later the person who has performed such an action will receive his full "entire account". And no "donations" will change the prescribed "punishment", and it is not a "punishment" in the full sense of the word, since there is no "punisher", because the "punisher" is **NATURE** itself, or rather, the laws of nature — the evolution of living matter..."

Nikolai Levashov also identified a special type of violence, when a person enters a state of **superorganism** outside of natural phenomena and is deliberately influenced through his subconscious. In most cases, such an impact is negative and is a criminal act of the person or persons performing such actions.

*These actions can be accomplished through both technical means such as TV, radio, through certain visual images, or a combination of, the impact of certain words or combination of words that activates certain subconscious reactions (key words), through music and certain rhythms to the same subconscious and **purely by the influence of the psi-field** of one person or group on all the others, bypassing the well-known human signaling systems - directly from the brain to the brain.*

*The **direct** exposure to the psi field is the most dangerous, since most people are not even able to understand that they have been or are being affected by any action without their knowledge.*

Psi weapons, therefore, are an ideal tool in the hands of the black forces, allowing them to do their dirty deeds with absolute impunity. In addition, they also form "scientific" and public opinions that psi-influence does not exist, and the very concept of it is anti-scientific. The "perfect" strategy is to convince everyone that psi-influence cannot exist, and then, with impunity, apply what "does not exist" to their gullible fellow citizens...

So, if one person or group, by their influence, forces the bulk to perform any actions that have negative consequences for others, the responsibility for these actions extends not only to the direct performers, but also to the "directors" of these actions. Moreover, a leader who gives orders to kill others, although he personally does not kill anyone, nevertheless, the consequences of these actions applies to him much more than to the perpetrators.

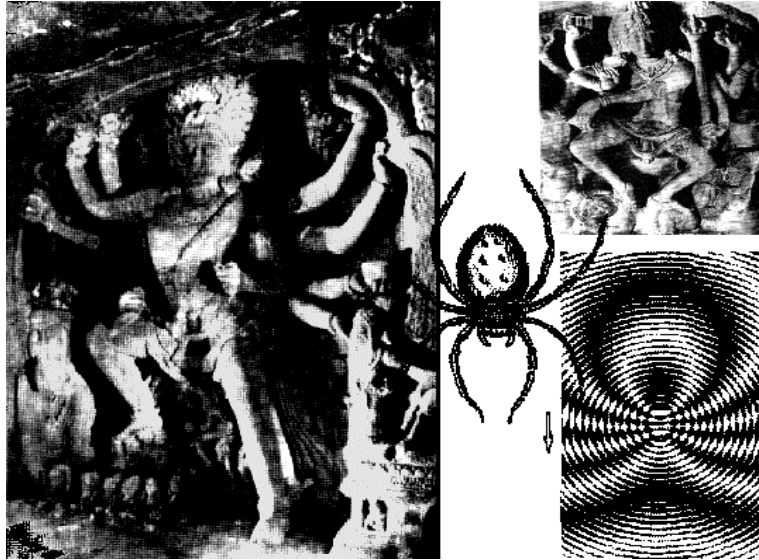

On the prerequisites for a new world order in the book "Revelation" by Svetlana Levashova.

The problem of resistance to the violence of the "dark forces" and the need to change the pre-existing world order is one of the key topics in the wonderful book by Svetlana Levashova "Revelation". These problems are very consistently and deeply revealed in the last chapters of the book in the dialogues of Isidora and the North. One could cite and quote these dialogues, as well as the thoughts of Isidora, touching to the depths of the soul, during the confrontation with Karrafa. But I decided to choose the small passage that, in my opinion, is closer to the topic we are considering. It touches on the reasons for the appearance of Radomir (Jesus) on Earth and the roots of his not entirely successful sacrificial mission:

Jesus was the son of the White Magus and our disciple, the Witch Mary. They gave birth to him to bring his amazing Soul to Earth.

*The Magi called him to Earth to stop the "plague", which, like a spider, has long been weaving its black web here. And it was the Magi who sent Christ to the Jews. But Jesus himself **was never a Jew**. The Magi hoped that he would have enough strength to stop the "black" Evil that was already spreading across the Earth. But Jesus lost by underestimating the "great weaknesses" of man... The Earth **was not ready** for His coming, just as it was not ready for the coming of the **KNOWERS**, Isidore. And we're not ready to help her. When the **right time** comes, we will open the Doors. And perhaps Light will prevail on Earth. But it won't be for a very long time...*

First of all, let's think about why Svetlana (Severa) uses the image of a spider weaving its black nets on the Earth? Not a snake that stings with deadly venom, or a beast that tears everything to shreds, namely a spider?

In my opinion, because the entities that have overcome the planetary level, in the inhomogeneous spaces of primary matters and non-inertial energies, already then saw the systemic structures that the Ebre invaders were trying to build. At the same time, it is important to note that **Svetlana** in her book did not invent any images and texts, she had the **unique ability of the most accurate energy-informational translation from the Past**. Here is how Nikolai Levashov wrote about it:

... What Svetlana could do was something incredible. At will, she could go back in her mind to the time when she was quickly scanning the pages, stop at the right page, and already at normal speed read what was written in the book, at a time when the book was not in her hands.

... It was the accuracy and objectivity of the information that Svetlana received that distinguished her from almost all other clairvoyants, psychics, who at best see and hear what they want to see and hear!

Recall how Nikolai Levashov himself emphasized the multi-level reading of SAV through images. Therefore, special attention from the above quote should be paid to the fact that the very "arrival" of the Slavic-Aryan **Radomir (Christ)** to the Jews was secondary, the main thing was **to stop the "plague", which, like a spider, had long been weaving its black net here**. But at the same time, under the conditions of the Ebrov intervention, the Earth itself (CPS) was not ready for the arrival of Him and other Knowers.

Now let's turn to the rest of the quote material. Why didn't the White Magus save his own son Radomir from a cruel death? Isidora's words constantly raise the question of how long the "dark forces" will commit evil with impunity. Why was the Earth not ready for the arrival of Radomir and the Knowing, and the Magi of Meteora were not ready to help her? The answer suggests itself and is given not only in the works of Nikolai and Svetlana Levashov, but also in numerous materials of the **Scientific Research Institute "TsUS" and the "Russian Scientific and Technical Society" (RSTO)**. But the answer is spatially given in the quote itself: When the **right time** comes.

So after all, what "Correct Time" was constantly mentioned by the Sever, the White Magus and other wise men of Meteora? It is clear that this is not the "apocalypse" and "armageddon", not the "end of the world" to which mankind was so persistently led (according to the invaders' plan, the elimination of all individuals not belonging to the 4XX brain genotype). Maybe you mean the next arrival on Earth of Hierarch Perun? But, according to the SAV, this can only happen in about 150 years. In addition, Nikolai Levashov has spoken about this more than once, answering the reader's question: "**Why don't the bright hierarchs come**" [2].

But such a **RIGHT time** is already coming!

In the eventful time, namely **2011.04.24, the act of the change of the System Power was finally completed**. This is truly an event of a universal scale - the elimination of intervention on Earth!

Since **2013.01.07**, the true state of any subsequent incarnation of the "Soul Essence" is not "Reincarnation", as in the interventional Management System, but a MANIFEST RITE.

Since the end of 2012, in certain geographical areas, the formation of a new Zone of Living Space (the Altai Management Complex) has begun for the subsequent existence of people integrated into the future. **In Russia** (with a part of the Arctic), **such a process of energy information broadcasting** will begin from **2013.10.25**. There is an active **re-creation of the true CPS** (construction of the true Planetary Cluster) and its Brain. This means that **the time of RULE** (Rules, laws of the Universes of Intelligent Orientation) **is approaching**, when the "**Laws of Nature**" — the evolution of living Matter (N. Levashov) and the "**Laws of Life**" for Spiritual Entities (B. Makov) begin to operate in full force on Earth.

Thus, transformations began in all constructions and states of being of the Earth's energies and their management, as well as the improvement of the civilizational development of mankind in a Reasonable orientation. And we are at the beginning of the **Transition Period** (2012-2024).

THE TIME FOR TRUTH HAS COME. THE TRUTH, which is USELESS TO HIDE, since everything IS ALREADY HAPPENING BEFORE YOUR EYES.

And this is the right time not by magic. And as a result of special preparatory processes described in the materials of the NII NCC Research Institute and the books of Nikolai Levashov. On the one hand, the true CPS repeatedly and imperceptibly interfered with its control correction in individual episodes of the established control of the existence of energies in the material and immaterial world, using the imperfection of the interventionist Control Systems. And on the other hand, the Light Hierarchs also came up with a way to organize a hidden counteraction to the "initiatives" of the interventionists and simultaneous guardianship of the CPS in such difficult conditions.

A generator that blocks development. (Blocking from possible errors during development in the conditions of the interventional Control System).

Among all public authors, only Nikolai Levashov mentioned it. In contrast, other researchers and writers could only rely on the Source of Life, which was mentioned in the SAV. But Nikolai Levashov could get information about the Block only on the basis of those own qualities and properties that corresponded to the highest number of octaves of energy and which opened access to receive such information from the CPS.

*He noted that: **After the disaster of Antlan (Atlantis) the Light Hierarchs also placed in the bowels of Midgard-Earth a generator that blocks the manifestation of human capabilities until the bearer of them reaches the level of evolutionary development that allows them to realize responsibility for each of their actions. This corresponds to evolutionary development, in which a person acquires six material bodies of essence to the existing physical [3].***

Thus, a peculiar system of "protection from fools" was created, which did not allow a developing person to use the possibilities of genetic potential until the carrier of this potential **ACHIEVED ENLIGHTENMENT** with **KNOWLEDGE, UNDERSTANDING THE CONSEQUENCES** of their actions and **AWARENESS** of **RESPONSIBILITY** for them. The completion of the planetary cycle of the evolution of man to a large extent guarantees it. And here it is important to note that the action of the **Blocking Generator** was jammed in the exit zone of the Source of Life, in which the level of octaves of energy had a significant superiority, and that is why its outputs were kept secret.

In the article by B. V. Makov "On Flora and Fauna", this issue is covered from a slightly different position: "On Earth, **there were no special means of protection**, as on Phaeton. With its Control and Generating complexes, the Earth was able to destroy or deflect any object commensurate with its mass in the so-called "Cone of Motion" (its parameters: a base with a diameter equal to the diameter of the Atmosphere, the angle of the top of the cone is 10) in order to avoid a collision with it. Therefore, **when attacking the Earth, all its Control and Generating complexes were turned off**. It was impossible for the interventionists to reach them due to the high octaves of the energy of the plates of the external protection circuit.

All the main complexes of the Earth's Control System were located under the plates. They managed to preserve a certain number of soul entities of the proto-Human with **224 levels of the brain octave** (33,864,000, which partially begin to acquire the Revealed Rite with the beginning of the Transition Period, the list is not provided)."

This somewhat more specifically explains the essence of the measures taken. After all, as a result, only entities remained on Earth that had only a level of development reaching 224 octaves of the brain, which corresponds to the conditions of biological life, but does not have the ability to influence the matter of the planet for the purposes of their own egoism, until they outgrow these levels. Spiritual entities with Brain octaves 96 – 124 were captured by the Ebras, whose Brain was transferred even lower - to the state of energies up to the level of 31 octaves (an attempt to simplify the brain, since the interventionists themselves did not possess such a level).

With them, experiments were conducted to derive the genotype of the 4XX brain, obedient to the commands of the Control Servers of the Ebrov system.

More precisely, **the peculiar work in the opposite phase of the Blocking Generator and the Source of Life in the spectrum up to 128 octaves did not allow the interventional control systems to detect the manifestations of the work of both "Generators"**.

(The Generators of the Source of Life of the Native SU continued to support, but their manifestation was not throughout the planet, but only in some regions, where the output of these energies was manifested by the extraordinary growth of plants and revealed hidden powers in the essences of people and sleeping gods, or gave them, according to their thoughts).

It is where the primary matter created the curvature of space territorially (or even pointwise) resonating with the octave spectrum of the Source of Life, and there appeared the so-called "Places of Power" (which had connections with energy-informational grids), or "exits of the Source of Life" (which were kept secret and guarded by the Magi). Of course, there were also opposite, so-called geopathogenic zones. Thus, a kind of system was formed that ensures the evolution and disclosure of **GENETIC CAPABILITIES** (including those of the "**SLEEPING GODS**") only with the right direction of development of the essence.

At the same time, another problem was being solved in parallel: **to reduce the significant evolutionary bias between the four races on Earth**, the mixing of which was actively spurred on and used for their experiments by parasitic forces. At the moment, there is not a single genetically pure people or nation. And this integration process continues. Here's how Nikolai Levashov wrote about it:

Unfortunately, this is the only option that makes it possible to ensure the mixing of genetic qualities without any significant visible external interference.

Thus, the return of all immigrants to Earth from other planets to the primitive level without exception is not only not barbarism or punishment for any sins, but is the only way to obtain the desired mixing of different gene pools and obtain a fusion in one-known qualities and, possibly, the birth of new ones [4].

(This confusion it was impossible to prevent, as the Native CPS was disconnected at the location of the servers, captured Ebrov system).

But there was another major reason for installing a **Blocking Generator** after the last world catastrophe. This was indirectly mentioned by Nikolai Levashov. In his book "Russia as viewed through Distorted Mirrors" (V. 2) he clearly recorded that, after all, Social Parasites - Dark Forces (Ebrovsky system ?! - A.Ya.) managed to penetrate Midgard-Earth, **establish their own Month on the Moon generators of psi-effects** and thus carry out the **FIRST STAGE OF CAPTURE OF MIDGARD-EARTH!** The installation of a blocking generator according to Nikolai Levashov after the last world catastrophe is consistent with the information from the materials of the **Research Institute "TSuS "**(B. Makov About Flora and Fauna). The installation took place in the period after the destruction of the so-called "Conditional "Second Civilization" in 10804 BC (in fact, this is the next stage of civilizational intervention of a violent nature). After that, over the course of 200 years, the first samples of "native" (lunar) humanoids (in their non-inertial energy essence), as well as some species of fish and birds, were transferred to Earth in a short time in several "deliveries" from the Moon. After that, from 10604 BC, the launch of interventional programs related to the so-called "The conditional" Third Civilization ", but in reality it is the same condition, but the third stage of the accomplished intervention. And it was during this period that the action of the Blocking Generator was especially necessary, since the most intensive saturation with experimental intervention programs was planned, and the Interventionist Control System was also not yet perfect. Here is how B. Makov characterizes this period (About Flora and Fauna):

This was the most jaded stage of experiments in all directions: from the formation of a stable interventional management in all directions of its own civilizational development, to attempts to introduce independently created elements in the field of flora and fauna (taking into account the obtained humanoid fragments from the Moon).

After the capture, with the help of reincarnation, only those entities whose brain octave met the requirements of the interventionists were forcibly used to create qualities manifested in the actions of people to gain a certain "chosen one". In fact, their choice did not lead to the growth of consciousness and reason, but to brain blockages, distortion of true knowledge and loss of the very possibility of harmonious development of the brain. **This is the genotype created by the ebras.**

Namely, **thanks to the action of the "Blocking generator", or rather, due to the inability to capture the more developed essences stored by the CPS within octave 224, there were so many failures in the intervention programs** "Energy biogenesis of the flesh cell", and then the programs "Energy-informational dialectics of the development of brain genotypes" ... For the same reason, the interventionist System was never able to get to the understanding of the secrets of the 4th codon of DNA and other fundamental knowledge related to the CPS.

In addition, an important point should be noted: the very fact of the irreparable elimination of the main power of the ebrov complexes and systems after the phaeton explosion in the future very seriously limited the possibilities of interventional influence and significantly changed the original programs of civilizational intervention, especially with respect to **Earth**.

Remaining limited options (based on the materials of the NII NCC), especially the level octave energies (up to 128 octave) have identified the lack of perfection, namely the Control System of the invaders were still not perfect, for this reason, the true Control System of the Earth (up to 512 octave) repeatedly and not markedly interfered with its management correction in some episodes, the current management of Genesis energy in the material and immaterial world. At the same time, it should be noted that the Earth, like most planets in a single **Cluster Interplanetary System**, was originally created without the technical ability of a special protective and destructive nature (only Phaethon was functionally endowed with the capabilities of a fortress planet). That is why violence of any kind, including social violence, on which the former world order was built, is so unnatural on Earth. The only possibility of a natural destructive character as a complete self-destruction in general was provided only in the case of an irreversible final capture of the state of the **Structure of the Earth's Atmosphere**. Over the past 18 thousand years, the density of frequency potentials in true octaves of energy (129-224 octaves) continued to remain without energy "recharge" (Control and Generating complexes were turned off), approaching zero according to the plans of the intervention program by December 2012. "The End of the World", "Apocalypse", "Armageddon" and other interventional information programs were timed to this event.

So, during the attack of the invaders, the Earth's SU did not have, unlike Phaethon, effective protective systems. In addition, during the attack on the Earth, all of its Controlling and Generating complexes were turned off, it was impossible for the invaders to reach them due to the high octaves of the plate energies of the outer protection circuit. Therefore, the installation of the **Blocking Generator**, imperceptible for the **Control System of the invaders**, to some extent created a kind of **Protection and Control System for the native CPS**, which operated in the spectrum of octaves corresponding to **the acquisition by a person of six material bodies of essence (in addition to the existing physical)**. Do I need to additionally explain that the Blocking generator was adapted and systematically integrated with the SOURCE OF LIFE (up to 512-1024 !?) in the octave spectrum (up to 128 octaves)?

Thus, the blocking generator was installed, among other things, to strengthen the native CPS, and just when it was planned to start the Ebrov experiments using humanoid fragments from the Moon.

Nikolai Levashov noted that, first of all, the action of the **Blocking Generator** affected the work of the brain:

And it is no coincidence that only three, maximum five percent of the total number of neurons in the brain of a normal person are active, and the remaining ninety-five to ninety-seven percent of neurons are "asleep". And what is most annoying, they "sleep" throughout the life of a person. Why did nature create such a "sleeping beauty" in the human brain, and what "prince" and with what "kiss" will be able to awaken these neurons from this lethargic sleep?!

And maybe it's not yet time to wake up this "sleeping beauty" of the human brain, maybe the person is not ready for this awakening?! Maybe the power and capabilities of the sleeping part of the brain are so grand and incredible that it will be better for everyone: for man himself and for nature as a whole, so that this dream continues? While it lasted...

It continued until the consciousness of humanity reached a certain level of maturity. Spiritual immaturity is worse than a nuclear bomb, and the ecological catastrophe on the verge of which the planet is located is a clear proof of this...

As repeatedly indicated in materials and articles of the Institute of NII NCC and RNTD, this **Spiritual immaturity** of the contemporary scientists who are forced **to be subordinate only to the so-called Pyramid of Knowledge, build the last 500 years (or rather, a Pyramid of "Horse" Knowledge** – wording AM Khatybov), does not allow them to go beyond the physical matter (inertial energy). They make up **only 10%** of the matter of the universe that should be in space. The remaining **90%** of this invisible and intangible matter by any physical devices (primary matter according to N. Levashov, non-inertial energy according to the materials of the Research Institute "TSuS"), those same scientists refer to nothing other than dark substance (dark matter). In this regard, I would like to remind you that the words of the "real" **Academician of the Russian Academy of Sciences E.P. Velikhov** have been circulating on the Internet for a long time, who officially stated that **modern science knows nothing about the so-called "Dark matter"**, which is 90 % of the matter of the Universe! [5].

This **Spiritual immaturity** is even more evident in modern geneticists, who have declared that they have already come close to deciphering the human genome and even DNA. At the same time, among geneticists since the mid-70s of the last century, **99% of the entire DNA chain was considered superfluous garbage (junk), or excess genetic slag** that does not carry any useful information. Now there are more than 4,000 disorders caused by errors in the reading of genes — even one wrong "letter" out of three billion can lead to the emergence of a particular hereditary disease. Most of these diseases bring with them severe suffering and early death. Many of these errors remain unrecognized because they affect a region of DNA devoid of genes, that is, the genetic "slag". Recently, according to most bioinformatics, the share of "garbage" in DNA has been reduced to 80%. Why exactly 80% is not explained. Probably, they adjust it to the well-known **Pareto Rule: 20/80**. With such scientific logic and the direction of scientific thought, it will not be surprising if 95-97% of passive neurons in the brain will soon also be attributed to excess garbage or excess slag!

But! As noted by A. M. Khatybov, **all information about the structures and properties of living cells is contained in the Brain, and not in DNA** (DNA contains some incomplete copies). In addition, the DNA itself is a kind of "conveyor" on which products are assembled.

As a result, the "false-planted" old system "**pyramid**" of "**horse knowledge**" in fact, is 80-90% "dump", where in the course to denote all the unknown terms such as "**dark matter**", "**garbage**", "**slag**".

That is why the motto is so relevant now: **"our task is not to be "helpers", but to dispose of and get rid of all unnecessary things that can somehow interfere with development in moving forward to the truth and with the truth."**

And yet, who will be the "prince" who will awaken the "sleeping beauty" in the human brain, and with what "kiss" will he be able to awaken the passive neurons of the brain from this lethargic sleep?

"Sleeping Kings"

Svetlana Levashova in her book "Revelation" mentions the 17 **KNOWLEDGEABLE PEOPLE** known to her who have gone into the future.

Why, according to Svetlana, "a person should sleep for several tens of thousands of years just to wake up **one day** to help another?" That is, the "Sleeping Kings" wake up at exactly the right time. And this may well be (and most likely is!) It will be associated with the achievement of the CPS and people of a certain range of octaves, including 512-th. (Until 2012, the Control System consistently moved first to the 224th octave, then took a course to the 512th. That is, the blockage of the interventional system was lifted, and the 33,864,000 entities that reached 224 octaves of the brain that were not used by the Ebrov system were released from captivity.

After all Entities on the planetary levels of Midgard-earth were freed from karma in 1995, and those who wished were returned to their home planet-earths, and in return new entities - volunteers came, significantly more indigo children were born on Midgard-earth, as the children gifted with paranormal abilities were not quite successfully "dubbed". And literally immediately, such children were hunted by the special services, the church, and various religious sects. And all of them do not care about children, to the point that they are simply disfigured, turning them into blind weapons for their own, very often, far from noble goals. (Mirror of my Soul-3).

The students of the mental school created by Nikolai Levashov are just the incarnated liberated Entities of the mental levels of the planet. Of course, along with these entities, there were also entities of a higher level of development, embodied in genetics 384 (this is not a genotype; this is the code that determines the belonging of these entities to the SIRIUS cluster system). They became teachers of the mental school, being active and in the state of the flesh. They were the ones with whom Levashov worked to liberate the planet from the invaders.

At the same time, for people, the most significant in the upcoming Transitional Period will be the **128 octave boundary**, which, according to Nikolai Levashov, corresponds to the acquisition by a person of six material bodies of an entity (to the existing physical), and according to the materials of the NII "NCC" and "RNT0" - the maximum value of octaves inaccessible to influence The old interventionist system.

FIG. 1

Flesh with such an octave level persists for a very long time, which is confirmed by findings that are carefully hushed up. Among them is the Tisulian find [6] and the sleeping magician Jaromir.

At the same time, it is important to note that all these millennia and centuries (the example of Esclarmond, which is mentioned in the book by Svetlana Levashov) "sleeping kings (queens)" together with all mankind were present on earth in all inertial (in certain territorial allotments) and non-inertial spaces (on an unlimited scale) and tracked in dialectics all the nuances and subtleties of the so-called "evolution of civilization" based on the material principle of existence. Especially with one of them, as Svetlana Levashova noted in her book, it was possible to communicate mentally when Nicolai Levashov was restoring his body after a long "hibernation". At the same time, Svetlana noted that not all of them managed to happily hold out until the moment when the same Knowledgeable Person was able to wake him or her up... therefore, their extraordinary sacrificial mission, hidden and invisible due to high octaves, was justified precisely in the conditions of the capture of the Earth by interventionist forces over the past 18 thousand years. They could not further risk the mission assigned to them (which must be completed at a strictly appointed time) by re-passing through the system of reincarnation imposed on humanity by the interventionists two thousand years ago. The higher the level of the entity, the more difficult it was not only to develop in the conditions of the Ebro experiments, but also to incarnate on Earth in general under the existing system of reincarnation. Here is how Nicolai Levashov writes about it, describing his incarnation with Svetlana on Earth:

Let me remind you that for incarnation in the physical body, the essence first falls on one or another planetary level. And being at this level, the entity is waiting for conception, in which there is a qualitative surge, harmonious with the level of the entity, and then this entity is embodied and begins its development in the genetics that corresponds to the disclosure of its capabilities.

In some cases, in order to speed up the necessary fusion of the necessary qualities of genetics, the entities themselves or their "nurses" influence the destinies of certain people so that their life lines intersect and the desired embodiment of the entity becomes possible. Both in my case and in the case of Svetlana, it was made so that the fate of our parents crossed, and it became possible for both Svetlana and I to appear. Not only did our parents' destinies intersect as a result, but they were also trained to make our birth possible. The dark side, which also knew about our essences, did everything to prevent this from happening, even to the point of killing us before we were born. But, anyway, both Svetlana and I appeared on Midgard-Earth and for a long time did not even know about what and why we were together on this planet. Each of us lived our own life, but fate led us invisibly to the moment when our paths crossed at one point, which in itself is a miracle, considering all the circumstances and conditions in which we found ourselves after the incarnation of our essences.

So, the implementation of the "Sleeping Kings" mission is likely to be especially necessary for the support and care of those people who will be integrated into the new conditions of existence of the Earth with higher octave energy spectra. Perhaps one of the main tasks of the "Sleeping Kings" will be to turn off the Blocking Generator at a strictly defined moment (or step-by-step). Apparently, it is no accident that some of them were in a state of suspended animation around the same era when this very Blocking Generator appeared.

But, as you know, other entities were incarnated on Earth, which performed missions of a different kind.

Keepers and the Best

In the materials of Svetlana and Nikolai Levashov, during the period of the capture of the Earth (and even outer space) by "dark" parasitic forces, if I may say so, two categories of high-level entities are distinguished, which have radically different missions and, of course, strategies in relation to these social parasites.

Some of them do not enter into open confrontation, and their mission and strategy are defined in one word - **KEEPERS**, or more precisely - Keepers of Knowledge. Our great ancestors bequeathed them to protect the ancient knowledge, and they have no **RIGHT** to interfere in the "natural" course of events. They pass on this Knowledge and Faith only to the gifted chosen, so that they will grow up to be KNOWLEDGEABLE people. They lead, as a rule, a hidden existence and do not interfere in an open confrontation with the parasitic system, even when their children and best students are threatened with torture and death, as was the case with the white Magus and other Magi of Meteora. And with this heavy burden they live for many years, until the real day of "awakening" comes on Earth, when the Earth finally becomes truly clean and wise, and when this knowledge becomes available to all. But even from this circle, some advanced entities can eventually take the path of passive abiding and dogmatism, slowing down the positive processes of development. They taught people with a spark of the gift from books that recorded all the spells or prayers.

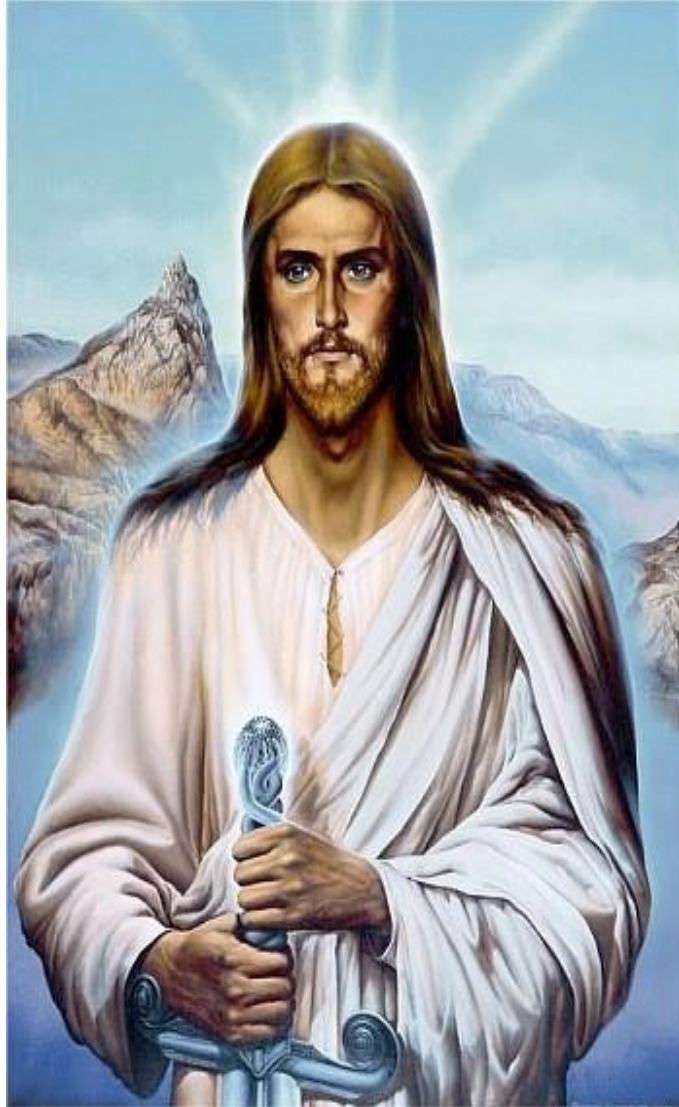

And as a result, there was a completely different caste of priests-magi, who **DID NOT UNDERSTAND** what was really happening during the casting of the spell! In such cases, Nikolai Levashov characterized the Magi-priests as "librarians." Below is an example from the text: The Highest Magi of Asgard-Iry could **NOT** even find the "Trojan horse", which the Black Magician attached to the baby, who himself later became the Highest Magi. Nikolai Levashov also mentioned in the "Mirror of my soul" (vol. 2) about the Keepers of the Big Universe! They could not prevent the death of the two Great Universes and decided to at least preserve the knowledge accumulated by billions of billions of civilizations of these **Great Universes**. The main Guardian named Force, as described by Nikolai Levashov, eventually left the safe space oasis and joined the White Brotherhood on the White Star, whose main mission was to cleanse the entire Cosmos from social parasites on all levels!

Others, on the contrary, enter into open confrontation with the parasitic system, playing the role of a kind of "drivers of humanity." They perform, as a rule, a strictly defined mission, often sacrificing everything most precious to save others, except for their beliefs, with which they came to this world to transform the life of society and humanity. Of all the words used to describe such entities, I chose the ones that Svetlana Levashov uses – the **BEST**, and often the best.

We somehow in everyday life stopped paying attention to the meaning of the words we use. But Svetlana most likely did not, by accident, choose the word best to characterize a special type of entity. As you can see, the root of the word is a RAY, which is simultaneously characterized as LIGHT and as DIRECTION. In this regard, again, there is a whole series of images associated with:

- with knowledge, enlightenment (not real application, but in the sense of combining the true Light of knowledge and its Broadcasting - an analogue of "Prophetic Oleg") and DEVELOPMENT (we recall the interpretation of N. Levashov);
- with the mission and vector of goals of the entity embodied in our world;
- with the RAY breaking through the wall of stagnation, dogmatism and ignorance;
- with the burning out by the rays of a system based on violence and material use;
- creating a new bright vision of the future and illuminating the horizons and ways of further development of the entity, people, and PEOPLE through intelligent orientation.

And one more comparison suggests itself: KEEPERS and THE BEST are like long-term and short-term memory. And the parasites did everything possible to distort the mission of the BEST, to prevent the closer integration of various types of energy information to expand KNOWLEDGE about the Created world (long-term memory). Here's how Svetlana wrote about it:

*"Thinking Dark", from time to time **give humanity a new God**, always choosing him from **the best, the brightest and purest**,... **but those who are necessarily no longer in the Circle of the Living**. As **dead**, you see, **it is much easier to "dress" the false "story"** and run with it into the world so that it would bring to humanity only what was **"approved"** by the "Thinking Dark", forcing people to plunge even deeper into the **ignorance of Mind**, swaddling their Souls more and more in **fear of inevitable death**, and putting the same **fetters on their free and proud Life...***

Thus, the GUARDIANS and the BEST, in my opinion, provided additional guardianship of the Light Forces on Earth and in the Universe. This accompaniment manifested itself:

- in a passive form (observation, analysis and preservation of information, differentiated transfer of knowledge), for example, a metaphor on Earth or a cosmic oasis with the Guardians of the Grand Universe.

- in active form through the so-called, "Leaders of Humanity", for example, Radomir, possessing the Power of thought on the scale of the Earth or on the scale of the Large Universes, in the end, preferred the primacy of the Keepers of the Big Universe - the duties and powers of the Chief on the White Star - the creations of Nikolai and Svetlana Levashov.

Svetlana and Nikolai Levashov about hidden programs of "dark forces" of controlling the human brain.

Let's start with two examples from the works of Svetlana and Nikolai Levashov.

Here is how Svetlana describes the introduction of brain control programs by "dark forces" not in some ordinary participant, but in one of the closest ascetics of Magdalene, one of the Knights of the Temple, who has a high dedication, but, nevertheless, carried out treachery:

... none of the Knights of the Temple knew that one of them from the very beginning was the henchman of the "dark" ... though he himself did not even know about it.

... **he did not see or feel** what the "dark ones" had once implanted in his brain, choosing him as their helpless "victim". And now, when the right time for the "dark" came, the "order" clearly worked, despite the feelings or beliefs of the captured person.

Sometimes the "dark ones" find something that the intended victim simply does not know exists. And she, this victim, honestly lives for the time being, until the muck embedded in her works, and until the person becomes an obedient doll in the hands of the "Thinking Dark Ones". And even when the implementation works, the poor "victim" does not have the slightest understanding of what happened...

He died believing that he had lived a good and kind life. He had never been able to understand why his friends had turned against him, or why he had been banished from Occitania by them. No matter how hard they tried to explain it to him...

But there is another side to this Temple Knight example. It is clearly noticeable how well the moment was used for the introduction of a planned religious program "**Not resisting evil with violence**", which was eventually used by the interventionists to establish a **World Order based on violence**:

*According to the plan perfectly calculated by the "holy fathers", on the day when Magdalene **was to die**, the knight who betrayed her was handed a letter from the messenger of the church, allegedly written by Magdalene herself. In this ill-fated "message" Magdalene "conjured" the **first Knights of the Temple** (her closest friends) **never to use weapons again (even in defense!), as well as in any other way known to them that could take someone else's life. Otherwise, "the letter said –" if they disobey, the Knights Templar will lose the Key of the Gods... because they will be unworthy of it."***

As a result of the terrible betrayal (with the help of the church) of one of the closest friends, after the cruel death of Magdalene (1094), this event gradually transformed Qatar, **turning strong and proud warriors into defenseless and helpless...** Making, as Svetlana noted, the Empire of the Sun and Light easily vulnerable and accessible.

This example shows quite clearly how the "dark forces" (Ebrov interventionists) carried out the programming of the brain of an individual and "entered" it into the general programs of society management.

And here is an example from the book "Mirror of my Soul", vol. 2 by Nikolai Levashov, associated with the **collapse in 1530 of Asgard-Iry**, which had **FIVE CIRCLES of POWER PROTECTION**, through which no one could pass with aggressive intentions, even one person, and not that of the army of enemies. And for more than a hundred thousand years, this protection worked flawlessly, until ... it was deactivated immediately before the attack of the Dzungar nomads.

And this happened, as Nikolai Levashov noted, due to the fact that one of the twelve highest magi of Asgard-Iry was the bearer of the "**Trojan horse**". He was a carrier, and he himself did not know about it, only when the **right moment** came, those who put this "Trojan horse" into it, activated it, and ... **the power protection of Asgard-Irian was turned off!!** The magus himself- the bearer of this "Trojan horse" had nothing to do directly with this, and therefore is completely innocent of the tragedy, despite the fact that it was he who unwittingly became the culprit of what happened. And the reason for this was, as Nikolai Levashov noted, the program laid down to him in childhood during the captivity of one of the Highest Black Magicians. Moreover, this procedure was not an isolated one, but was carried out with all the captured children, who then by a "happy" chance (and most likely programmed) were repulsed from captivity by the knights. Moreover, the "Trojan horse" was laid on those levels that were not known not only by the captured kids, but also by the Higher Magi of Asgard-Iry. Note again that these events took place just when the **500-year-old programs**, which we mentioned in section 2, began to be implemented. Electromagnetic grid - a web that was of fundamental importance for the development and existence of mankind and all life on Earth until the moment of the change of System Power.

Using this grid, they began to form a "pyramid of knowledge", to give information (including prophetic, as in Nostradamus), to remove it, to change the structure of life according to the appropriate program, including material use and social violence). **Under the web, the brain was subsequently created, which could "shoot" and process that part of the information that is necessary for the control system of this structure.**

And this example is also very revealing from another side.

And Nicolai Levashov placed a special emphasis on this:

After all, the most interesting thing about this is that none of the Higher Magi **COULD even** detect the presence of a "Trojan horse"! This is what happens **when knowledge ceases to be alive, and turns into dogma** even with the best intentions and because of apparent necessity.

How relevant is this right now, when certain interested parties are trying **to turn the unique knowledge that Nikolai Levashov brought into our lives into another dogma** (even if it is from the best of motives and because of apparent necessity and not outright ignorance). They try to isolate and oppose each other **N. Levashov, A. Khatybov, N. Morozov – these outstanding scientists and researchers of Russia. As Boris Makov noted, "Nikolai Levashov was destined to reveal one of the 12 directions about a different truth of the 'Created World'.** He coped with this task brilliantly, and thus earned the veneration of today's people. That's the main thing."

To the credit of Nicolai Viktorovich, with all the grandiosity of the problems of the universe considered by him, in his speeches and books he could always admit some mistakes and omissions. Here, for example, is how he gave a critical assessment in such cases in his book "The Mirror of my Soul":

... relying on the "scientific" method, I made some hasty conclusions in some places of this book, which were not quite correct. Instead of checking everything thoroughly myself, using my own methods, I trusted the conclusions of others.

Therefore, a coherent (holistic) understanding of another truth of the "Created World" can, in the end, be obtained only by delving deeper into new and new facets and directions of cognition that emanate and broadcast from the reviving CPS, which is the main focus of the **research institute materials "NCC" and "RNTO"**. The two examples we have considered from the work of Svetlana and Nikolai Levashov are just very consonant with these materials and are their integral part.

You can add more and more examples about the Templars and Knights of Malta, or how Light Hierarchs turned into Dark Ones. But the bottom line still remains **that over the past millennia, humanity has been under the external control of "dark forces"** (interventional control systems) that carry out their programs through the Brain. And even the high level of development of the Knights Templar, the High Magi, representatives of alpha genetics (Knights of Malta) or even the Hierarchs themselves was not a guarantee and impenetrable protection from the impact of these programs.

Whether it is necessary after that to specify in detail what impact the main population of the Earth was exposed as a result of implementation of programs of "Development of Brain Genotypes".

Much has been written about this and in sufficient detail. Nikolai Levashov, unlike Alexander Khatybov, **did not touch on the physics of the processes of interventional programs** "Development of Brain Genotypes". This information at one time had a closed nature and was designed for the so-called circle of "scientists" people. Materials of Nikolai Levashov **from this area had the purpose of public information broadcast**, understandable for the majority of the population. Therefore, he operated with such concepts as "Trojan horse", "power protection", etc...

But the main point is that both outstanding scientists, **N. Levashov and A. Khatybov, were united in the ultimate goal of these very programs for controlling the brain of people – this is the threat of turning the mass of people into biorobots**, which is increasingly confirmed in our lives.

By the way, **"all 4xx robots have a reference frequency (when building biostructures) of 61 octaves. If it is removed, the robots will disappear (annihilation of the body's flesh)."** B. Makov. "Basic Functions of Atmospheric Layers"
