

PYRAMIDS. A New Look. Part 1.

Author: [Yuri Ocheretyanny](#), [Dmitry Haryushin](#)

Since ancient times, the peoples of the Earth on all continents have known the grandiose structures that exist on all parts of our planet – these structures have the shape of a PYRAMID. They have different sizes, different appearance and design, including pointed, truncated, stepped or smooth, as well as a lot of underground pyramids. The material of manufacture is also different - these are stone blocks and clay bricks, earthen pyramids, etc. Why they were created, how they were used and in what ways they were built, official science can only speculate so far.

We will consider these multi-functional devices through the prism of New Knowledge set forth in F.D.Shkrudnev's monograph ["Reconstruction of Reality" book one "Disclosure of the Hidden \(intervention: how it was\)"](#).

There were times on Earth when there were no pyramids at all. However, there is information from the native Earth Control System that allows, albeit not completely, to talk about the goals and objectives of building pyramids on our planet. The earth is an artificially created formation. Before the attack of the Ebrov civilization of the constellation Ursa Major, more than 18 thousand years ago - there were no seas, oceans and rivers. Water was stored in storage facilities that remained as primeval - this is Lake Ladoga and Lake Baikal.

A real cosmic-scale incident occurred between 18-17 thousand years ago during the capture of our planetary system by the star fleet of the Big Dipper, which included the attack ships of the interventionists of the 3 Moons - Lelya, Fatta and Month.

<p>18344 г. до н.э.</p>	<ul style="list-style-type: none"> - На Кластерную межпланетарную Систему Земли (в состав этой Системы помимо Земли входили: Меркурий, Венера, Марс, Фазтон, Юпитер, Сатурн, Плутон, Нептун, Уран) было совершено нападение силами звездного флота Эбровской системы из созвездия Большой Медведицы планета Сур. - Планета Фазтон (из системы Земля) приняла на себя основной удар, обладая таковой защитной возможностью и мощностью, и истребила большую часть нападавших, но была захвачена. В этот же день она взорвала себя вместе со всеми объектами, которые сумели ее пленить и были на ней. В результате планета Фазтон ликвидировала 2 Луны, 11 главных объектов, 1200 автономных объектов нападения. Уничтожив 2/3 вражеского звездного флота, сама она стала поясом метеоритов. - Луна, Солнце и спутники планет системы Земля входят в состав звездного флота интервентов.
-------------------------	--

In 18,344 B.C. –

- The cluster interplanetary System of the Earth (in addition to the Earth, this System included: Mercury, Venus, Mars, Phaeton, Jupiter, Saturn, Pluto, Neptune, Uranus) was attacked by the forces of the star fleet of the Ebrov system from the constellation Ursa Major planet Sur.
- The planet Phaeton (of the Aemlian system) took the brunt of the blow, having such defensive capability and power, and exterminated most of the attackers, but was captured. On the same day, it blew itself up along with all the objects that had managed to capture it and were on the ground. As a result, the planet Phuston eliminated 2 moons, 11 main objects, 1200 autonomous objects of attack. Destroying 2/3 of the enemy star fleet, it itself became a meteorite belt.
- The Moon, the Sun and the satellites of the planets of the Earth system become part of the intervening star fleet.

During the defensive actions, Lelya and Fatta were destroyed by an exploding Phaeton. The remnants of Lelya are now Saturn's rings. Fatta was hit unsuccessfully - it broke into 3 parts and 1 part hit the Earth (now the Mariana Trench is in this place). It is not yet known where the remnants of this piece of Fatta went.

There was a shift of the Earth's axis and our planet began to collapse. Realizing that the Earth was falling apart, the interventionists organized some preventive measures, one of which was the construction of a giant wall along the ocean floor from Pole to Pole. This wall was created to prevent further "destruction" of the planet's protective plates during the formation of the continental zone (as well as the pyramids – at the same time) before filling the "gaps" with seawater, as a kind of "antenna" linking the underwater pyramids and control complexes. By the way, this is also a reason why the water in the seas and oceans is salty.

The second preventive measure turned out to be no less grandiose, since the interventionists organized a single injection of water from space into diverging parts of the Earth in order to hold the entire structure. This stuffing became seas and oceans that simply did not exist before. Salt water "glued" the structure of the Earth, and the continents are the parts of the planet into which the Earth disintegrated. This process of stopping the destruction of the planet lasted for several thousand years.

<p>17304 год до н.э.</p>	<ul style="list-style-type: none"> • Полностью захвачены все планеты и уничтожено все живое, а их души (неинерционные энергетические сущности) захвачены в плен. • Окончание захвата звездной системы планеты Земля. • Планеты системы Земля окружили спутниками, как «конвой». • Началось движение в сторону созвездия Большой Медведицы.
<p>17304 г. до н.э. – 16684 г. до н.э. 620 лет</p>	<p>Первый этап насильственной «Цивилизации» Земли.</p> <ul style="list-style-type: none"> • Изоляция плит защитного контура планеты слоем магмы. • Первая «заливка» поверхности планеты Земля «своей водой» (с тритием) и формирование песка из этой воды. • Поверхность Земли стала выше на 4300 м. • В атмосферу Земли добавлен кислород и фтор. • Формирование интервентских объектов управления на поверхности планеты.

In 17,304 B.C. –

- All planets were completely captured and all living things were destroyed, and their souls (non-inertial energy entities) captured.
- The end of the capture of the star system of the planet Earth.
- The planets of the earth system were surrounded by satellites, like a “convoy”.
- The movement began in the direction of the constellation Ursa Major.

From 17,304 BC - 16,684 B.C. - 620 years –

The first stage of the violent “Civilization” of Earth.

- Insulation of the plates of the protective contour of the planet with a layer of magma.
- The first “filling” of the surface of the planet Earth with “their own water” (with tritium) and the formation of sand from this water.
- The Earth's surface became 4,300 m. higher.
- Oxygen and fluorine were added to the Earth's atmosphere.
- Formation of interventional control objects on the surface of the planet.

The orbit of the Earth's rotation around the Sun changed, the movement of tectonic plates had become active, which could lead to the destruction of the entire Earth's surface. Our highly developed Hyperborean ancestors had to build pyramids all over the planet at certain points and thereby stabilize the axis of inclination and the orbit of the Earth. And most importantly, stop the process of vibration of the Earth's surface, which began from the movement of tectonic plates. Planet Earth had been saved!

All the pyramids built above the Great Wall of China were also built by our ancestors, who were forced to help the invaders to save our planet and not let it completely collapse.

Pyramids are lenses with the help of which the distribution of energy flows changed, increasing the stability of the planet, i.e., they are a type of stabilizer of the Earth's magnetic field, removing the possibility of a strong vibration of the Planet.

Mecca – Antarctica – Russia – Egypt

We are used to the fact that the largest pyramids are in Egypt and Mexico, but inquisitive researchers using the Google program "Planet Earth" have found many unknown pyramids, strange structures and geoglyphs. In recent years, pyramids have been found in China, Russia, Yugoslavia, France, Morocco and other countries.

China

Near the large city of Xi'an, in the very center of agricultural fields, ancient pyramids were discovered. There were several dozens of these pyramids, and one of them reached a height of 60 meters, that is, only half the size of the largest pyramid of Cheops in Egypt.

For a long time, European science did not even suspect the existence of these pyramids, and it was only in 1997 that amateur archaeologist Hartwig Hausdorff managed to get the consent of the authorities to investigate the mysterious structures. The pyramids turned out to be made of clay bricks, but for a long time they could not be recognized as pyramids, since their slopes were overgrown with trees and it seemed that these were ordinary hills. And the Chinese authorities banned excavations, saying that the study of mysterious buildings is a matter for future generations.

PYRAMIDS OF THE KOLA PENINSULA

Archaeological excavations of pyramids have been carried out on the Kola Peninsula for a long time, which are at least 2 times older than the Egyptian ones and it is still not known by whom they were built. The Kola Peninsula is in the northwest of the European part of Russia, in the Murmansk region. It is washed by the Barents and White Seas. The area is about 100 thousand km. These amazing pyramids and huge stone slabs made by artificial means, discovered on the Kola Peninsula, are a strong argument in favor of the existence of an ancient civilization in these places. The most ancient pyramids of the world discovered on the Kola Peninsula confirm the existence of the legendary Hyperborea. The Kola Peninsula has recently been visited by numerous researchers, hunters for sensation and scientific discoveries. And this is just one example, and there are a lot of them.

pyramid on Mars
the moon

All the planets of the Solar System have pyramid complexes, and some of them are intended for processing "space debris". All pyramids on Earth are necessarily connected with Systems of command and control. Pyramids are included in the complex of structures of the Earth's Control System along with such structures as Control Systems, Communication Systems, Power Supply Systems, Control Complexes, etc.

Now 409 pyramids on Earth are officially registered, and another 1400 natural hills are similar in shape to pyramids. There are about 100 pyramids on the territory of Egypt. New pyramids are found not only on land, but also at the bottom of the seas and oceans. Pyramids have been found on planets and satellites of the Solar System. After the discovery of the ancient pyramids on Mars, the Moon, Phobos, Ceres, the scope of study has significantly expanded. If earlier they belonged to one planet Earth, now the scale of the study began to relate to the Solar System. Comparisons of the location of the pyramids by analogy with some constellations (the Great Pyramids at Giza and the three stars in the constellation Orion), as well as the location of the corridors of the pyramids in the direction of individual stars, lead to the scale of cosmic consideration.

The construction of the pyramids testifies to the construction technologies that remain completely incomprehensible to us. The pyramid is an artificial mountain weighing 6.5 million tons. Stone blocks weighing up to 100 tons are fitted to each other with such precision that a knife blade does not pass.

Most often, the simplest idea is expressed: the Pharaoh had a very large number of slaves. It remains to explain how the problem of accommodating these huge crowds was solved? And what are the reasons for such a crazy

venture?

How were the blocks extracted from the quarries? Classical Egyptology allows only the use of wet wooden wedges driven into the cracks of the rock as a technique. The builders had only stone hammers and saws made of soft copper. And what further thickens the mystery: how were the stones, weighing 2.5 tons or more cut, lifted and fitted?

No tools for scientific calculations have been found, nothing that would indicate a complex technology. Or is it still worth admitting that amazing architects and decorators, just to satisfy the megalomania of their pharaoh, extracted, transported, decorated, lifted and nailed to each other, with

an accuracy of up to millimeters, 2.6 million blocks of the Great Pyramid, in size and shape, accidentally came into their heads. And all this by the forces of slaves who created all this with the help of pieces of wood and saws for cutting cardboard, carrying everything on themselves?

We know almost nothing about what happened in those distant times. We also do not take into account that the searches were carried out by people for whom modern civilization is the only possible technical civilization. It is possible, however, that a thought completely different from ours could have created a technique no less perfect. Measuring instruments and methods of processing materials, that have nothing to do with what we know, have LEFT VIRTUALLY NO TRACES.

Methods of pyramid construction were used, which are not yet familiar to Earth builders. Those who study New Knowledge are only theoretically familiar with the METHOD of ENERGY SYNTHESIS followed by the SYNTHESIS OF MATTER, perhaps it was not the efforts of one person, but the work of highly developed People who could concentrate their mental collective efforts to build such a grandiose object.

Together, they could concentrate their capabilities in one place and for a short time, with the help of a common collective brain (imagine what capabilities it had), attract the

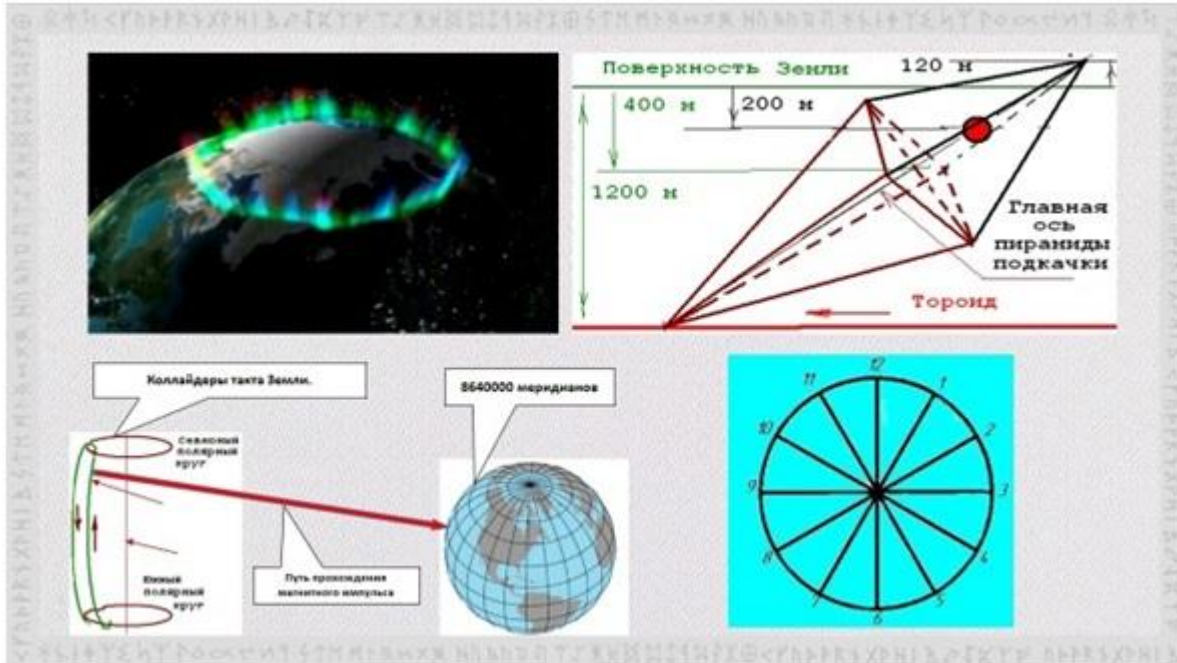

energies of the necessary frequency ranges to create a pyramid model from "cold plasma", and it could be small in size and bring it to an ideal state (measure seven times). Next, carry out calculations with the involvement of the computing complex of power facilities of the Earth Control System. Then all these data together with the model could be loaded into the

program of synthesis (construction) of the PYRAMID from the available energies. The number of investments in "matrix technology" in such a program can only be imagined ... I think a lot. And the last step is to create a substance synthesis generator from our planet's energies, then put a pyramid substance synthesis program into it and we are all waiting together for the finished object. The construction time in the case of the Pyramid of Cheops or the Chinese Wall is several decades. The commission for the acceptance of the object was not required, since the volumetric model was brought to perfection **IMMEDIATELY!!!**

During the construction of the pyramids, a system of physical units was used, which remained a mystery. Translation into the existing system of units does not give an idea of the meaning and purpose of the pyramids. The accuracy of the calculation of some geometric constants is up to 124 decimal places (determined by indirect calculations when the size ratios lead to a constant). It is possible that an onboard UFO computing system was used for calculations (Object 440 has 12 onboard computers). In those days, only Hyperboreans and Ebra could do this, I admit that their joint efforts were too important a task – the task of PRESERVING the PLANET!

Pyramids are QUARTZ GENERATORS that produce strictly defined frequencies. They generate them according to the software for filling spatial areas, structures of living organisms, they are types of transmitters of information for the execution of programs. A pyramid having a specific shape structurally (energetically) looks like a Russian doll, a pyramid within a pyramid.

One pyramid has an ionic structure, that is, visible to our eyes, the other is in a hidden state, our eyes cannot see this, but thanks to it, the processes of realization occur. The explicit pyramid here is necessary to serve as a frame, a structure of retention, a reference point.

I would like to emphasize one more feature – the Earth, like Man, has a "BRAIN" (as part of the leading energy-informational regulator for the flow of control information) located in the upper (northern Arctic Circle) part of the "trunk" and is far from accidental. Moreover, the translational group of pyramids, which forms the reference cycle of charge fluctuations for all the base frequencies of the planet's energies, is also located along the parallel of the "Arctic Circle", and as you can guess, probably not by chance either (three groups of four pyramids). Maybe that's why it's recommended to sleep with your head to the north?

The pyramids of the southern and northern polar circles (12 in each circle) are needed for energy pumping, accelerating the magnetic pulse of the clock through the formation device (collider). The task is to provide the CLOCK (self-oscillation-1.008 oscillations per second) necessary for all metabolic processes in the body, taking into account hundredths of microseconds and spreading energy-information through the energy-informational grids of the atmosphere along meridians and parallels.

The upper part of the pyramid of the Arctic Circle protrudes to the surface so that there can be a mountain of any size above it. When dispersed, minerals are formed within a radius of up to 2000 km.

Pyramids with fixed and floating geometries are known. The first pyramids with floating geometry (immaterial pyramids) were discovered on the moon. The main purpose of pyramids with floating geometry is similar to a carjacker's scanner – linking a new frequency structure to existing ones. A specific frequency is created by a pyramid, it cannot be created by any modern technical means on Earth.

End of the first part
