

1.03. Scientific base of SvetL

Author: Shkrudnev F.D.

Our task is not to be "helpers", but to dispose of and get rid of all unnecessary things that can somehow interfere with development in moving forward to the Truth and with the Truth.

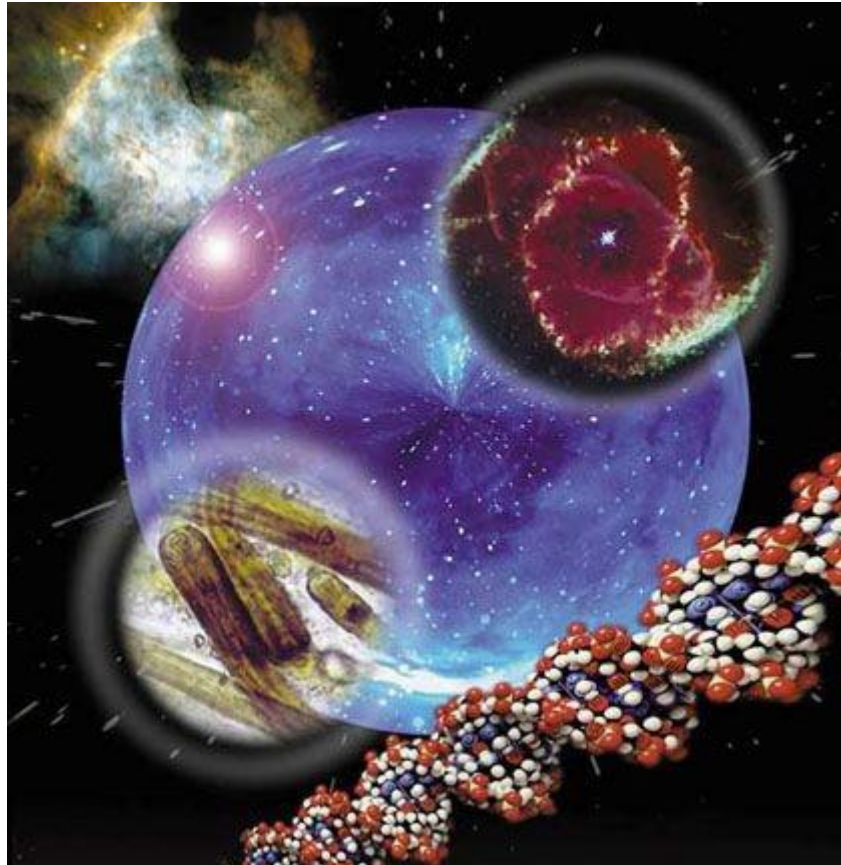

This is the utilizer.

But it does not dispose of garbage, but people who are mired in garbage.

As a result of the analysis of Your questions that have come to us over the past year, we were allowed to take up this work and provide assistance in understanding what is happening before your eyes, and in Cognition of the Truth, to move forward.

A lie, a half-truth, a distraction from what is truly happening for the sake of the so-called "ruling elite", which automatically tries to maintain "its" dominance "over us" cannot today be an obstacle for those who are allowed to speak the truth and truth, no matter how it is perceived by the people around us. We want to convey to You, by all means available to us, only what we can publicly announce from all the information that we have and that we currently own. We will also tell You about the technologies of the future that are already working today, causing **EXTRAORDINARY** attitudes of people who are still under the influence of old dogmas and knowledge of the so-called "modern science". **You can draw the conclusions.**

But we want You to know that not much time is allotted for Your comprehension of all that You, in the process of learning this information, comprehend and accept or not accept for Yourself and Your PROMOTION on the way to true rationality in assessing what is happening. **Today it is Your choice and nobody else's.**

We will provide you with materials that are currently being collected within the framework of the **Russian Scientific and Technical Society** in cooperation with the **Research Institute "Center for Proactive Strategies"**. We will also provide some **materials that were closed until today**, and it is appropriate to highlight them. You may have already read a lot, but we **strongly recommend that You** re-read everything that we are starting to publish. This should be a solid foundation for You to move towards the Truth. The basis in understanding what is happening. In choosing the right DESTINATION for yourself on this difficult part of Your journey today.

We will give the material in a summary form, with comments and explanations of individual relevant points, referring You directly to the **ORIGINAL texts**. The basis of all submitted materials **are the works of OUTSTANDING RUSSIAN SCHOLARS - N. A. MOROZOV, A. M. KHATYBOV, N. V. LEVASHOV**, head of the Research Institute of TSUS - **B. V. MAKOV** and staff of **"Russian Scientific - Technical Society"**, headed by **F. D. Shkrudnev** and other authors, whose works explain what is happening today. We hope that all these materials will be widely disseminated by those who consider it possible, and we will only welcome it.

* * *

The mind of a truly recreated Human begins to awaken with its need to know the truth from the moment of the beginning of a new energy-informational broadcast from the recreated Control System. People are no longer satisfied with the previous state of dominating dictatorship on the part of the dogmas of the old system of Government; people have turned their thoughts to the truth about the "Arranged world today". In this sense, they can no longer be held back even by any regime of administrative violence and imputed restrictions in the so-called "Scientific Field", which are being destroyed every day, as well as any other element of the already unmanageable former Structure of Organized life for people

We will try to be at least somehow useful in this cognitive aspiration of our admirers, but we consider it expedient to provide public information about the past **only in general annotation** terms for the reason that the model past itself, in an ideal mirror sense, **will not be recreated due to the inexpediency of this**, although we understand that the cause-and-effect obligation of the civilizational development of the Universe and its laws must be observed at the present time. In the process of ongoing changes in the entire current surrounding reality, the Earth's Management System **will not ignore the previous true states of all elements of the previously surrounding proto-reality**. Everything that was introduced by the interventional System and does not base its existence on further parasitic violence against the environment - will adapt plastically, acquire its expediency according to a new natural function and, in the future, can be preserved. Undoubtedly, everything will be recreated and brought to the harmony of being, but relative to the current time of the event chronoprocess, **taking into account the lost 18,000 years**, as well as the expediency of preserving or eliminating the already accomplished surrounding reality in its deviated state from the true civilizational development, but with the obligatory imputation of the plastic format transition, providing an opportunity for everything that is reasonably preserved to adapt to the current changes, **but not at the expense of something or someone else, weaker**. The process will be significantly compacted and accelerated within event time, as lost time and programmatic commitment to excellence must be compensated. Some components of the entire current biological environment will be excluded by themselves, as fragments of the "true evolution" that has not yet been completed (due to the intervention of the Earth), but is no longer appropriate for the future. As they sometimes say - "immediately and simply happens only after castor oil". We hope that with Your help and sparing attitude to us, we will be able to achieve some results that are useful for gaining true knowledge about the past and future, and in general terms, we will partially satisfy the requests within the framework of the questions asked to us.

In fact, if we present a certain conditional program algorithm in the principal model framework for ourselves in the leading directions of ongoing changes that are partly directly related to human life as such, then all of the above makes significant corrections, and in some cases complete changes, both in the very essence of managing processes for the formation of a complex state of the Managed environment, and Managing changing living conditions on the Earth as a whole.

This, first of all, will directly affect the issues of changing the target essence of all subsequent existence on Earth, and in particular, the correction of functional and target endowment for Humanity, respectively, and the indispensable change in its organized existence as such. **The new being will no longer be based on a single goal-oriented aspiration, focused only on material goods,** as in the previous and current society of people.

The peculiarity of the new complex management in general, as well as the **management of the eventual arrangement of the entire changing existence of energies as a whole within the framework of the new chrono-process of the development** of the Civilization of the Earth, lies in the fact that after the accomplished change of the "Systemic Power" the process of recreating the states of harmony of being must necessarily **take place at an increasing pace,** since a reasonable necessity arose for the need to compensate for the used event time for the lost last 18000 years.

As a result, soon, i.e. upon reaching the complete perfection of harmony in all states of being of energies in the **entire interval up to the level of 512 octaves,** the Earth, at the behest of the Supreme Governing State and the Laws of Life, **will acquire a new limit value of a higher level of octaves of energies, i.e. up to 1024 octaves.** It is in this way that a kind of qualitative transition of all states of matter in the Earth model to the next stage of its civilizational development will be carried out, as a controlled process by the Supreme Controlling State within the hierarchy of Civilizations Development of planetary models with Reasonable orientation.

And this is a completely different level of all possible developing states of energy and their structures, a different stage in the development of the Civilization of our planet as a whole. Moreover, these are **fundamentally different possibilities of the material and non-material states of being of energies,** including those associated with the acquisition of new program and target conditions for the formation of a completely different organized human being at a higher level of its perfection. All the changes that are taking place now in a clear speculative format demonstrate and mean a factorial threshold of a significant and essential correction in the "Created World" that is not made by hands. However, current observers and their scientific supervisors **position the facts of such manifestations far from the true understanding of the very essence of the physical processes of change.** Unfortunately, such facts of changes and the apparent speculative effect of the consequences of their achievements are most often paid attention to **by Ministers of Religious denominations.** But they also give such observed facts of changes, basically, a warning sacred meaning and character, without indulging in explanations about the true physical essence of everything that happens around us. **It won't matter much to the next generation.**

The very essence of the future sacrament, as a state of awareness of some unattainable knowledge ("a gift given from above") and the sacred retention of such a sacrament, will be on a completely different level, corresponding to the changed level of knowledge of any current stage of development. This will be a completely different basis for the new Faith in the future.

One of the significant fragments of all that is happening now, namely, the resulting corrections at the current stage of event time associated with the reconstruction of the native Complexes of the Earth's Control System for the formation of a true complex being of energies, will inevitably lead to changes in both the intensity and the very essence of energy-informational life support and, first of all, for people. This, as an inevitable consequence, will necessarily cause fundamental changes in the previously established basis of all directions in the worldview of people relative to previously established truths about the "Created World". This can only be achieved on the basis of appropriate consideration of the new higher level of knowledge provided to people by the new Management System. In turn, this will lead to a change in the resulting product in the awareness of the objective surrounding reality - a deep correction in the very essence of the individual and social consciousness of people.

At present, this process is already taking place in the most active way, but without people realizing the true essence of the changes and the speculative effects of everything that is happening. So far, it manifests itself only in a **conditionally conscious limited form**. At the initial stage, this is expressed through **a kind of auto-motor negation of all traditionally established species, forms and states of the past level of world outlook, independent of people.** There is a mass manifestation of internal dissatisfaction with everything that is happening. In particular, there is dissatisfaction with the actual processes of the everyday plan and level associated with global changes in the world around us, and in the search for a new comfortable place in it. There is a growing dissatisfaction with the structure of the modern social arrangement of society, organized for living people, with the collapsing states of organized existence within the framework of the preserved norms previously established by someone conditionally accepted "fair" law, dictating and forming an unjust organized life for different social levels and groups, mainly a violent minority over the majority.

The majority of people who are now in a state of irreversible "non-worshipful" expression of their life position regarding their own participation in various spheres of life organized for them, involuntarily there is a so-called "rebellion of consciousness", both individual and social.

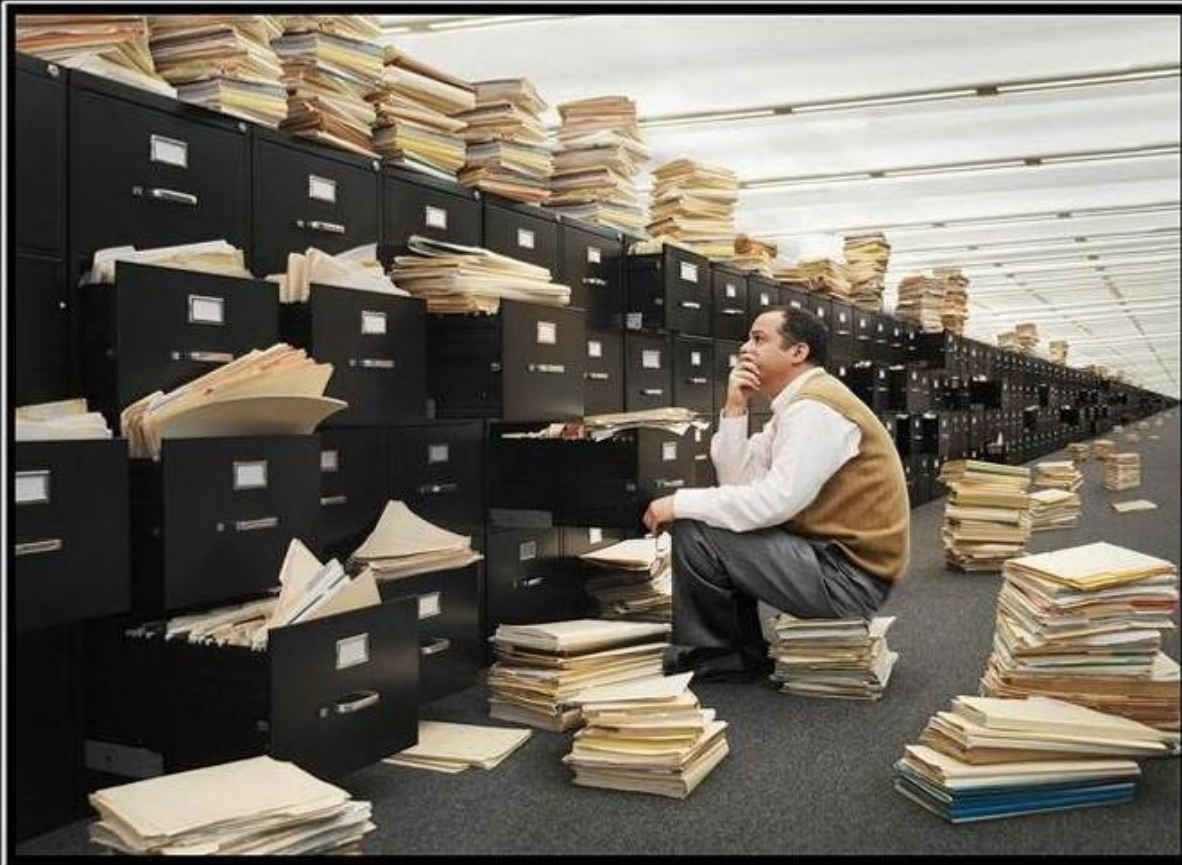

someone must change our destiny!

For the present time, this is quite a natural behavioral and performance process that is beyond the will and desire of people, because the former peaceful energy-informational support from the old Management System, which previously supported the former levels of worldview with its information management broadcast at a sufficient management level of effectiveness, **no longer exists**.

A new process of energy-informational support from the new System is still effectively impossible for the general mass of people due to the limited level of the state of functions and the reaction of their brain (in all its three states) in the changed conditions of energy grids that comprehensively form intelligent life support as such.

Thus, there is no effective control efficiency on the part of the Control System for changing people's consciousness, since they can only accept a new energy-informational broadcast of a cognitive nature in a limited way, partially decipher, broadcast, and therefore, accordingly, perceive and realize the entire reality of the change in general. **In other words, the changed energy-informational essence of the surrounding objective reality is now perceived only by an extremely limited group of individuals.**

This condition is temporary. This is precisely the important problem and the main feature of the current "man-made" traditional processes of managing the existence of people at the beginning of the Transition period, which at this hour cannot be realized by the majority, **but must certainly be taken into account by a leading and externally initiated group of individuals** who actually allowed this to be **realized for a number of reasons independent of them!** **Categorically, this fact should not be perceived as a new "chosen one".** Impostors, in the sense of some "specially chosen in the past", are no longer in demand in the present and future history!!!
