

# **An appeal to the peoples of the World in the name of saving life and the planet Earth itself**

The world has irrevocably changed.

The domination of the violence of Western countries over the countries of the World is disappearing into oblivion, and with them the parasitic power of the United States and its satellites, based on the belief about the inequality of the peoples of the World, ceases to work policies focused on neocolonialism, expansion and war.

The former Structure of managing the cohabitation of the people of our planet, based only on parasitism and violence by an insignificant minority over the overwhelming majority, destroying nature itself, predation of the resources of the planet Earth, has certainly and finally been overthrown. The vector of orientation of the past path of civilizational development of people has finally completed its destructive nature of impact both for the entire surrounding natural nature and for all spheres of life of people in the world community.

Any attempts by the belligerent West to recreate a violent Structure with its past coercive influence, aggressively manifested by hidden clan formations with the support of the NATO power bloc, are completely isolated from reality and will no longer have the same success.

The attempts on the part of the Anglo-American-European capitalist hegemonism, which is fading into oblivion, to force them to recreate the former state of worship of the world community before them, have finally collapsed and no longer represent the level of event significance in the life of the planet.

The peoples of the planet have realized that the World is much larger than expansionist Europe, the hegemonic claims of the USA and Great Britain to the level of their "significance" declared by them in the organized international spheres of human existence.

The world in its present incarnated reality is facing the choice of another path of civilizational development which should and will undoubtedly be autotrophic and creative in nature, oriented towards the reconstruction of Man's true mission on Earth, gaining his position of trusteeship over the surrounding nature for comprehensive protection from destruction and pollution of our planet, giving Mankind an intelligent orientation to its development, gaining a higher level of knowledge of the truth of the Universe in the interests of developing the creative potential of humanity.

Despite the fact that the structure of the former global governance has been destroyed, there are still elements of its administrative and power footprint, as the former "institution of democracy," which, daily and hourly is losing its former state of overwhelming influence on the World. This remaining trace has now been dressed up in the form of a triune fascism: Financial Fascism, Administrative-bureaucratic fascism and National-demographic fascism.

The growing power of parasitic violence of triune fascism, was gradually nurtured from the early 30s of the 20th century on the geopolitical Anglo-American-European platform, in order to achieve the prevailing level of development of their financial-industrial capitalism on the basis of forcible capture of resource and raw material values of most of the world.

Fascism manifested its growing level of destructive aggressive activity and target-orientation in various ways during the decades of its discrete development. Having dressed itself up as a global power system, fascism immediately proceeded with the actions of ruthless coercion of the people of the world, in order to achieve a state of superiority of self-appointed leaders and their peoples, over all other peoples, not even neglecting the forcible deprivation of their rights to life itself.

The artificially created destructive civilizational way of life of triune fascism, which is still based on the remnants of the former hegemonism and parasitism, demonstrating its militant grin and bestial cruelty, does not want to give up its positions without a fight and peacefully withdraw from the current eventful world processes.

The USA, Canada, England, Japan and the countries of Europe continue to impute the illusion of their self-proclaimed superiority in choosing the ways of the development of the World through their means of blocked information, openly revealing the accomplishment of elements of the usurpation of the rights to freedom and life of the majority of the peoples of the World.

Their time has passed. It is hard for the pseudo-elite of the World to accept this, so it attempts, with the help of its pocket media, to create a distorted socio-political picture of the World, based on misinformation, distortion of history, outright lies and slander. It has had to fight against alternative viewpoints, restrict freedom of speech, impose censorship, persecute dissenters, and expel unwanted media.

Having degenerated from the once conditionally democratic countries into liberal-totalitarian parasitism, infected with their artificially created exclusivity and arrogance towards the majority of the peoples of the countries of the world, intolerance towards other cultures and dissent, the Anglo-Saxons and their European satellites returned to their old policy of encouraging fascism and neo-Nazism, openly, today, demonstrating it to the people of the whole planet. This policy is no longer compatible with their own previously established slogans, such as "sacred private property", "freedom of speech", "equality of peoples" and others.

No longer concealing their destructive plans even after the Second World War, it was they who staged war crimes for the mass liquidation of the peoples of Afghanistan, Iraq, Syria, Libya, South Ossetia and other artificially organized "hot spots" of the planet. They also initiated and organized a bloody coup in Ukraine in 2014, which eventually brought the Nazi junta to power, which immediately organized terror and the destruction of its own population, regardless of its multi-nationality.

Under false democratic slogans, political freedoms were eradicated, and the persecution and murder of dissenters was organized. Even young children were inculcated with a spirit of false superiority of the Ukrainian nation over other nations, hatred of the Russian people, and contempt for the peoples inhabiting Russia, Belarus, and other CIS countries. All minorities were declared second-class, non-European peoples. The authorities of Ukraine gradually turned the country into a terrorist state, as the center of an actively progressing modern triune fascism of the entire Anglo-American-European geopolitical platform.

For Russia, this was the constitutional basis for conducting a special military operation on the territory of Ukraine. This operation is not a war of conquest, but truly it is help to the fraternal peoples in liberating them from the Nazi junta, dressed up in real modern fascism with the help of England, the USA and the European Union. This was the reason for the persecution of Russians and everything connected with them in the countries of the West. Again, fascism is preparing a campaign to the East, again trying to deprive Russia of the right to freedom of choice, conscience, religion.

It is no secret that the so-called higher and former standard of living of the population in the so-called developed countries, is only partially based on the technological superiority over the other, contemptuously called by them, third world countries. In reality, their development and well-being are based on wealth stolen and exported from the USSR, India, China, Africa and many Asian countries.

The blood of hundreds of millions of victims of the peoples of various countries of the world, are on the hands of the U.S., England and "enlightened" Europe, shed only during the last century! They will never confess or repent of this, nor will they ever apologize to the numerous victims of their wars of plunder. It is only the life of a European that has "meaning", and to them the rest of the peoples are just "subhuman", which is why they do not see the massacres of Iraqis, Serbs, Libyans, Syrians, Russians and other peoples of the World, as genocide. That is why the leader of one of the largest countries in Europe, which destroyed tens of millions of peaceful Soviet citizens during World War II, is laughing today when he hears about the genocide of the Russians in Ukraine.

This should not be repeated in the event processes of our time. This must be put to an unconditional and irreversible end. Russia will not put up with this state of affairs and is ready to defend its freedom with arms in hand, to fight for the Peace of equal peoples without aggressive wars, whether they are economic, informational, forcibly diplomatic or any other.

That is why for us the countries of the West, led by the United States and Great Britain, are the heirs of the Third Reich, and the European Union itself has now turned into the image of the Fourth Reich, an alliance with the Nazi ideology of the superiority of the false European "super ethnos" over other peoples, imposing its dubious values on the whole World, denying the right of countries to their identity, free choice of development paths, substituting international law with their own "rules" of conduct and internal laws that do not allow countries to have the right to their own protection and defense.

Russia declares that from now on it considers the authorities of the United States, Great Britain, the Federal Republic of Germany, France, the Netherlands, Denmark, the Czech Republic, Slovakia, Poland, Lithuania, Latvia and Estonia to be descendants and continuers of the past deeds of the Nazi invaders, who have now openly embarked on the path of destroying Russia and its inhabiting peoples.

Russia was forced to use its right to self-defense in the conditions when it was declared a hybrid war, already openly oriented towards the destruction of the state and its people.

In the current international conditions, Russia does not ask for help or support, but we appeal to the peoples of our planet to make their choice in favor of the emerging new World without Nazism, parasitic violence and other forms of coercion, for equal conditions for the development of all spheres of the newly emerging existence.

It's time to give all the peoples of the planet a chance for a fair world order without imputed Western hegemony, without "exceptional" nations of self-styled "superhumans" and their rotten moral authorities.

For a World without neo-colonialism, fascism, Nazism and xenophobia, without racial and social segregation.

For a World of equal countries and their peoples, real sovereignty, non-interference, without a block world order.

**Russia has made its choice.**

Russia does not need foreign territories, it has no plans to include any additional countries in the Russian Federation, but Russia will protect the rights of its compatriots by all means available to it within the framework of international law, wherever they are.

Russia will help its allies and friendly countries to defend their sovereignty and the right to freedom of choice of the path of development.

Russia proposes to unite the efforts of all Mankind in the field of saving the Earth from the predatory attitude towards it and its biosphere, the consumer attitude of Mankind towards the planet, its resources, other living beings inhabiting it and, especially, towards each other. Start with the preparation and implementation of fair International Laws for the real protection of the natural environment in the interests of all the people of the planet Earth, and not in the interests of aggressive global financial clans with their predatory approach to the destructive use of human resources.

Russia will in every possible way assist national and international projects in the field of providing the population of the Earth with drinking water, solving the food problem, restoring destroyed ecological systems, purifying the air and the oceans, and using waste-free and resource-saving technologies.

We invite the peoples of the World to support the proposed Beginning for the transition to a different path of civilizational development, to support the work begun by Russia to create a new world order that ensures the sustainable development of countries and peoples in harmony with the civilizational development of the Earth itself, based on equality and respect for each other, based on a system of comprehensive collective security in everything, uniform and equal for all.

We believe that countries sick with arrogance and exclusivity will soon heal and see the light, and will also join the construction of a new, more just World.
